

Applications & ServiceNow Remote Agenda

Topic	Description
 Guestload	Learn about Guestload, the Application instance created on every VM that provides insights into Placement and Rightsizing using VM consumption metrics.
 Enriching the Supply Chain	Understand how Turbonomic/CWOM uses SNMP, WMI, and Application targets to enrich the Supply Chain.
 Integrating ServiceNow into Turbonomic/CWOM	Learn how to add a ServiceNow Orchestrator target into your instance and create Orchestration and Right Time Action Policies so ServiceNow will be able to integrate Turbonomic/CWOM actions into its workflows.
 Reflecting Turbonomic/CWOM Actions in ServiceNow	Understand how ServiceNow treats Turbonomic/CWOM actions as Change Requests, enabling approved actions to be executed during a Right Time Action window in Turbonomic/CWOM.
