

Taking Actions Agenda

Automating Placement Actions

- Explain how Turbonomic's Policy Editor works
- Use scoping to apply policies to specific groups
- Apply Action Types and Action Acceptance Modes to a policy
- Understand the hierarchy of policies

Automating Resize Up Actions

- Create a group of VMs that specifically support Hot-Add
- Build an Automation Policy which permits Hot-Add VMs to Resize Up automatically
- Understand the effects of conflicting Automation Policies

Scheduled Cloud-Scale-for-Performance Actions

- Create an Execution Schedule and append it to a policy
- Differentiate between the effects of an Execution Schedule versus a Policy Schedule
- Temporarily disable all actions

Wasted Files & Volumes

- Understand how Turbonomic identifies On-Prem wasted files
- Know how to remove On-Prem files or directories from the wasted file analysis
- Explore how Turbonomic identifies unattached cloud volumes
- Automate the deletion of unattached cloud volumes
