

# Automatically assure application SLOs with Turbonomic and Instana

**Customer experience is critical to the digital business.** IT leaders are holding themselves to a higher standard, connecting continuous performance and automation to business-centric SLIs and SLOs. It is essential to building trust across strategic stakeholders and accelerating digital transformation initiatives.

**Turbonomic and Instana together turn observability into action, delivering automation that prevents application performance risks while maximizing elasticity.**

## SLO-Aware

### Continuous application context.

For all applications... correlate application response-time, transaction throughput, or other SLOs to dynamic resourcing. As demand fluctuates, dynamic resourcing will ensure continuous application performance.

Build trust with all stakeholders. Help App Owners & Line-of-Business take actions and automate continuously. Always show automation's impact on the business / customer experience.

## SLO-Driven

### Cruise control for your applications.

For cloud native, horizontally scalable applications... containerized services can be automatically scaled out (and back) to meet changing demand based on app response-time, transaction throughput, or other SLOs.

You set your SLO and AI-powered software ensures that the platform and underlying infrastructure always provides the resources they need to meet those SLOs—wherever your applications run.

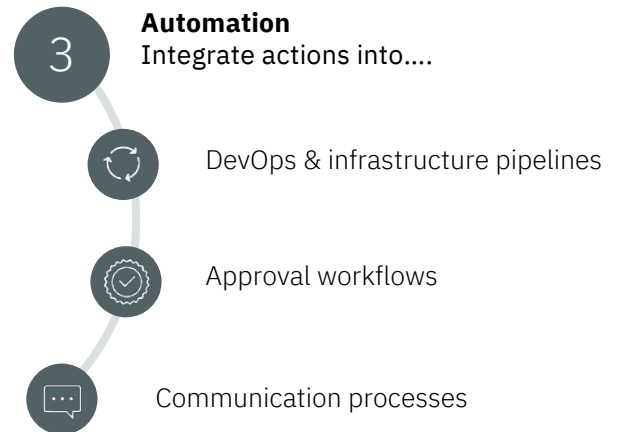

*HPA doesn't cut it. SLO assurance requires full-stack analysis & action!*

# Integrate automation with pipelines & processes.

Automation at scale necessitates a proactive approach.

Integrate resourcing actions with any pipeline, IaC, ITSM, or communication tool in your organization!

- **Ansible**
- **Azure DevOps**
- **GitHub**
- **GitLab**
- **Jenkins**
- **Puppet**
- **Slack**
- **Terraform**

...and more!

“Our team’s macro goal is to deliver an application- and SLO-driven hybrid cloud. Applications will run wherever it best suits the business, and they will continuously perform and delight our customers. Turbonomic is not only helping us specifically operationalize our vision, but also giving us the time back to focus on what strategically impacts SulAmérica’s business.”

Rafael Noval

Technology Leader of NOC & Web at *SulAmérica*
